ZA by NAOTO FUKASAWA

emeco

FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful furniture that lasts through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

Crafted for life

Za is a modest and humble stool created by Naoto Fukasawa, whose focus is on purposeful simplicity – a perfect combination with Emeco's heritage in aluminum craftsmanship. The stools are made by hand at Emeco's factory in Hanover, Pennsylvania and are guaranteed for life.

The name "Za," means "a place to sit" in Japanese – a name that speaks to the multi-functionality of a simple stool that can be used anywhere; an object a person will unconsciously choose to sit on.

Za is offered in natural aluminum with matte hand-brushed or hand-polished finish as well as six powder coat colors that reflect the joyful spirit of the collection. Hand-brushed and powder coated stools are suitable for outdoor use.

emeco

Hand polishing is a unique Emeco tradition. We polish every inch of every chair 3 times, by hand.
It takes us 8 hours. But it's time well spent. When we're done, the chair gleams like a piece of jewelry.

Recycled aluminum is Emeco's signature material. It is super light, yet super strong. It is also non corrosive, fire proof, and has a very low carbon footprint. Perfect for a multi-functional, timeless stool.

Za Mini - a low stool that joins the existing family of modest and humble stools created by a thoughtful designer whose focus is on purposeful simplicity. The low stool is a multifunctional companion, perfect as a low seat, a side table or foot rest.

Soft spot

Seat pads for Za stools are offered in 100% merino wool felt and leather. The felt seat pads offer a smooth feel, great durability and abrasion resistance that prevents pilling and wearing. The leather seat pad is made from skirting leather, traditionally used for saddles and holsters, which gives the pad some heft and helps hold its shape. The leather is vegetable tanned, which allows it to patina beautifully with use.

Made of recycled aluminum.
Hand brushed and powder coated aluminum suitable for outdoor use.
Ansi-Bifma tested. Fire resistant. VOC certification and HPDs available.
Life time warranty. MADE IN THE USA.
